

OS Certification support for Hitachi Advanced Server DS7000 Series

Note: Configurations added since the last matrix will be shown in **red** text.

Introduction

Use this interoperability matrix to check whether a proposed OS for a customer configuration is supported. This matrix shows OS certification status for the Hitachi Advanced Server DS7000 Series.

Please refer to other relevant OS support matrices for details on storage, switch and HBA interoperability.

If a combination does not appear on the OS support matrix, the customer's Hitachi Vantara Sales Engineer (SE) or other HV field service employee must submit an Interoperability Support Request in order to gain support for the new configuration.

Legal Disclaimer

This information is subject to change without notice. The information contained in this document is provided by Hitachi Vantara for general information purposes only and is based on information as of the date of distribution (indicated by the date above). HV makes no express or implied warranties of any kind whatsoever regarding the contents of this Document or the performance of the products referred to in these documents and HV expressly disclaims all warranties including, without limitation, the implied warranties of satisfactory quality, merchantability or fitness for a particular purpose, the statutory warranty against infringement, and any warranty of title. HV will have no liability whatsoever for any direct loss or damage (but excluding any liability for death, personal injury or fraudulent misrepresentation) or for any indirect, special, incidental or consequential damages, including but not limited to loss of data or records, lost profits or other economic loss, arising out of or in connection with the use of this information even if such loss was foreseeable or HV had been advised of the possibility of such loss.
