

Hitachi Vantara Support Matrix of Veritas's VCS and DMP

Preface

This Document is the Hitachi Vantara's current Veritas Cluster and Path Manager support matrix representing Hitachi Vantara's current support position for various versions of Veritas's Storage Foundation Suite Volume Manager. Cluster Server and Path Manager on various Hitachi Vantara supported Operating Systems connected to the supported combinations listed are also supported by Veritas.

Legal Disclaimer

The information contained in this document is provided by Hitachi Vantara for general information purposes only. Hitachi Vantara makes no express or implied warranties of any kind what so ever regarding the contents of this Document or the performance of the products referred to in these documents and Hitachi Vantara expressly disclaims all warranties including, without limitation, the implied warranties of satisfactory quality, merchantability or fitness for a particular purpose, the statutory warranty against infringement, and any warranty of title. Hitachi Vantara will have no liability what so ever for any direct loss or damage (but excluding any liability for death, personal injury or fraudulent misrepresentation) or for any indirect, special, incidental or consequential damages, including but not limited to loss of data or records, lost profits or other economic loss, arising out of or in connection with the use of this information even if such loss was foreseeable or Hitachi Vantara had been advised of the possibility of such loss.

How to use this document – This chart describes the Hitachi Vantara with Veritas VCS and DMP product interoperability:

Yellow cells are newly added support since last revision of this document.

“Yes” – means the combination is supported, “Submit ISR” – means Hitachi Vantara currently does not support the specified, and “No” means either EOL is announced for that product or we are unable to support it due to some technical limitation.

For a comprehensive technical description of any of the Products indicated in this document and a definitive parameters, please refer to the official published specifications and/or user guides for such Products.

Yes = Supported

Submit ISR = Currently not supported. ISR needs to be submitted in order to add support.

No = Not Supported. This is either the product is near EOL or it's unable to support it due to some technical limitation.

Hitachi Vantara Support Matrix of Veritas's VCS and DMP

| | Veritas Product Version | Product Combination | VSP G1000/F1500 | VSP Gx00/Fx00 | HUS-VM | VSP |
