About this Document

This document provides the latest information about Hitachi Compute Plug-in for VMware vCenter. It includes information that was not available at the time the technical documentation for this product was published and known problems and solutions.

Intended Audience

This document is intended for customers and Hitachi Ltd. partners who license and use Hitachi Compute Plug-in for VMware vCenter.

Getting Help

The Hitachi Data Systems Support Center staff is available 24 hours a day, seven days a week. Provisions for patches and fixes are restricted to normal business hours, 8 a.m. to 5 p.m. PST.

To reach us, please visit the support Web site for current telephone numbers and other contact information: <http://www.hds.com/services/support/>. If you purchased this product from an authorized HDS reseller, contact that reseller for support.

Before calling the Hitachi Data Systems Support Center, please provide as much information about the problem as possible, including:

- The circumstances surrounding the error or failure.
- The exact content of any error message(s) displayed on the host system(s).

Hitachi Compute Blade 2000 Blades	Models
Standard Blade Server	R3 and S3
Standard Blade Server	R4 and S4
High Performance Blade Server	A2

Hitachi Compute Blade 2500 Blades	Models
CB520X	B1 Note

* **Note :** HCSM 8.1.1 or newer is required.

Changes in this Release

New Features

- CB2500 Chassis support
- CB520X Server B1 Blade for CB2500

Known Problem

- Not Applicable for this release

Fixed Problem

- “Though chassis equipped with dual management modules normally assign a separate maintenance IP address to each module, the active module’s maintenance IP will appear to apply to both the active and standby modules (in the VMware vSphere Web Client interface).”

This problem is depend on HCSM version 7.x.x , and the problem is solved by HCSM 8.0.0.

Documentation

This release includes the following document:

Hitachi Compute Plug-in for VMware vCenter User’s Guide
