About This Document

This document provides the latest information about the Hitachi Storage Adapter for Oracle WebCenter. It includes information that was not available at the time the technical documentation for this product was published, as well as a list of known problems and solutions.

Intended Audience

This document is intended for customers and Hitachi Data Systems partners who license and use Hitachi Storage Adapter for Oracle WebCenter for Hitachi storage platforms.

Getting Help

The Hitachi Data Systems Support Center staff is available 24 hours a day, seven days a week. Provisions for patches and fixes are restricted to normal business hours, 8 a.m. to 5 p.m. PST.

To reach us, please visit the support Web site for current telephone numbers and other contact information: <http://www.hds.com/services/support/>. If

you purchased this product from an authorized HDS reseller, contact that reseller for support.

Before calling the Hitachi Data Systems Support Center, please provide as much information about the problem as possible, including:

- ☒ The circumstances surrounding the error or failure.
- ☒ The exact content of any error message(s) displayed on the host system(s).

Hardware and Software Support

Note  The software and hardware listed below are supported by this release. Hardware and/or software that are not listed in the table(s) below are not supported by this release.

Software Prerequisites

Product	Version
Oracle JDK	1.7
WebLogic Server (WLS)	10.3.6
Oracle WebCenter Content	11.1.1.8.0
Hitachi Content Platform (HCP)	5.0.0 and 6.1.1

UCM Component Deployment Requirements

- ☒ The files to be used for this release are available and located in the UCM release directory.
- ☒ Ensure that a backup of the environment has been taken.
- ☒ Access Requirements
 - UCM Web UI Admin (UCM Administrator) access
 - WebLogic server UCM Admin access
 - UCM File System access as Unix / Windows User

- ☒ Back up the file store provider.hda file. This file is at the following location:

```
%MW_HOME%/user_projects/domains/<domain_name>/ucm/cs/data/providers/defaultfilestore
```

MW_HOME is the abbreviation of Oracle Middleware Home.

- ☒ Access to an HTML Editor application is required. The Windows Textpad editor or any other HTML editor application can be used.

New Features

Support for Hitachi Content Platform(HCP) 6.1.1

Known Problems

1

The client invoking REST services on HCP 5.0.0 and 6.1.1 does not pass the SSL certificate along with it.

This is a known issue. When the Oracle WebCenter UCM invokes any service on HCP 5.0.0 and 6.1.1, it must pass an SSL certificate to HCP. Otherwise, the `java.io.IOException`, "peer not authenticated" is raised.

Workaround: Pass the SSL certificate when invoking services on HCP 5.0.0 and 6.1.1.

2

Filename in UCM is a file number prefixed by the string "primary_file".

Files should be stored in HCP with same number.

3

The retention value cannot be reset to null.

4

Repository manager-related configuration and thumbnailing are not tested.
